United Nations General Assembly designates 19 November as World Toilet Day

SANITATION FOR ALL RESOLUTION

Today's decision to mark World Toilet Day on 19 November will help the UN raise awareness and mobilize action that can save millions of lives. 2.5 billion people lack toilets, and poor sanitation is a leading cause of disease and child deaths. Everyone needs a place to go!

GLOBAL GUIDELINE FOR PRACTICAL PUBLIC TOILET DESIGN

worldtoilet.org

Foreword

The concept of simple, standardized toilet design seems like a relatively straightforward and practical concept but to billions of people around the world with no access to basic sanitation, the difference between their governing body being able to afford to install public toilets or not could mean the difference between life and death. The International Code Council and World Toilet Organization brought together the world's sanitation leaders, which resulted in the first edition of the Global Guideline to Practical Toilet Design (G-3). The document will result in a dramatic increase in restrooms in many nations, which will, no doubt, reduce the number of illnesses and unnecessary deaths caused by improper sanitary conditions.

Over the last three years, sanitation experts from around the world gathered in Macau, Singapore and Philadelphia to conceptualize scope and create the content in the G3 document to give guidance on basic care and maintenance to ensure clean, convenient, hygienic, and safe public toilet facilities of appropriate design and quality, making them more economical so as to provide greater accessibility to a larger population.

Although this guideline alone cannot solve the critical issue at hand, it is a step in the right direction and we would like to thank the many experts from around the world including the technical committee members, staff and skilled professionals that have dedicated their time and expertise to this project and to those that devote themselves to this critical life-safety issue every day.

Sanitation is a human right essential to the full enjoyment of life and all other human rights and was declared so in 2010 by the United Nations General Assembly. It is believed that the provisions contained within the G3 will enhance global efforts to provide the proper tools for sanitary toilet installations as urbanization continues at an unprecedented pace.

We, along with our collective memberships and stakeholders are determined to increase access to toilet facilities everywhere and urge those responsible for such, to adopt the practices and provisions contained herein.

Sincerely,

Jack Sim

Challenges in Brazil

- Lack of sewage treatment and waste water management
- 5,560 Olympic pools of poo discharged into water bodies and surface land everyday
- 100 million without access to proper sanitation
- 280,000 hospitalized for diarrhea annually
- 94% managed by public utilities, 6% by private companies
- Public funded is stretched. PPP & Efficiency needed

Legacy for World Toilet Summit 2019

- Laws & Standards for Close Loop Sanitation to prevent diseases & pollution of water bodies
- Affordable Off-Grid Sanitation Treatment Technologies
- Awareness & Public Education for Adoption of Toilets
- Financing Sanitation
- Build Communities Action through Sanitation Ambassadors, eg celebrities, church, local politicians, schools, etc
- Universal Coverage of Sanitation in Brazil
